

Start isolating for 10 days

GET A TEST

NHS coronavirus or 119

Positive result

Please inform us as a matter of urgency if you receive a positive result so we can stop the spread. We will not identify your child when communicating to other parents

Your child must remain at home for 10 days from when the symptoms developed and follow NHS Track and Trace guidance

The rest of the household must isolate for 14 days, including siblings, so they will not be able to return to nursery either

The NHS Test and Trace will call for recent contacts

Children cannot return until they are symptom free and are well in themselves

As soon as the results are back please send a screenshot of the text message, or forward the email with proof of the results

If results are negative, and your child no longer has a fever, they can return to nursery
